1 Design Brief

1.1 Rationale

1.2 Project Overview

1.3 Onyx Features

- Access all music on any device
- Zero compression, lossless fidelity
- Gapless playback for non-stop mixes
- Designed to handle large libraries (> 10,000 songs)
- Powerful search engine to rediscover music
- Discover music beyond personal library (Music Pool)

2 Specification

2.1 System Architecture

2.2 Module Description

2.3 Employed Technologies

- NodeJS - Server Runtime
- Forage - Search Engine
- Redis - Data Store
- npm - Dependency Manager
- Webpack - Module Bundler
- React - UI Framework
- Concise - CSS Framework
- Font Awesome - Icons
